

Sixth Form Additional Reading and Research List

Suggestions for generally broadening your awareness include:

- Broadsheet newspapers: The Guardian, The Times, Independent, Daily Telegraph
- BBC News online: www.bbc.co.uk/
- Al Jazeera English: www.aljazeera.com/
- CNN online: <http://edition.cnn.com/>
- The Economist: www.economist.com/
- The New Statesman magazine: www.newstatesman.com/
- The Financial Times (for secondary schools): <https://www.ft.com/ft-secondary-schools>
[our school is registered to enable access to full content from within the school. You are also encouraged to register yourself for updates at <https://join.ft.com/f52def46-bc77-4211-9095-0c292609f469>]
- The New Scientist: <https://www.newscientist.com/> [we have subscriber access to the full archive with username and password available from the library or via the EPQ documentation but you are strongly advised to take out your own subscription and read this regularly if you are a scientist]
- Also ask the librarian about our subscription to JSTOR academic articles (via <https://www.jstor.org/>) and the free academic articles available at the DOAJ (<https://doaj.org/>) or see our EPQ handbook for more on sources for academic research

MOOCs – Massive Open Online Courses – These online courses provide videos, reading lists and activities – you often don't need to formally complete the course to use the resources :

- FutureLearn – www.futurelearn.com [free online courses pitched at a range of standards and a UK audience from the Open University – highly recommended], e.g.
 - <https://www.futurelearn.com/courses/adult-first-aid?lr=24> – First Aid for adults
 - <https://www.futurelearn.com/courses/epq-success?lr=2> – How to succeed in your EPQ
 - <https://www.futurelearn.com/courses/preparing-for-uni?lr=16> – Preparing for University
- <https://www.edx.org/> [free online courses from a range of Universities]
- <https://www.youtube.com/playlist?list=PL30C13C91CFFFEA6> [Michael Sandel's 'Justice' course – the most popular Uni course in the world, both at Harvard and on-line – covers morality and justice]
- www.coursera.org [free online courses from a range of Universities]
- Oxford University podcasts: <http://podcasts.ox.ac.uk/>
- Cambridge University audio and video lectures: <https://sms.cam.ac.uk/>
- <http://ocw.mit.edu/courses/> [free online courses from MIT]
- <http://oyc.yale.edu/> [free online courses from Yale]

In addition, you can find excellent learning resources at the following:

- HE+ (<http://www.myheplus.com/>) – A website put together by Cambridge University to support 6th form students in all subjects with wider reading and applications (not just for Cambridge)
- Staircase 12 (<https://www.univ.ox.ac.uk/applying-to-univ/staircase12/>) – A website put together by Oxford Uni to support students considering HE applications (not just Oxford) – contains interviews and book reviews etc

- YouTube Has its own educational channel which organises useful content under particular educational headings at <https://www.youtube.com/channel/UC3yA8nDwraeOfnYfBWun83g> . There are of courses masses of other useful academic videos.
- If you haven't found it yet then <https://www.youtube.com/user/crashcourse> is fantastic for lots of subjects, parcelling them up into 10 minute videos including nice animation
- <http://www.iflscience.com/> is well worth following for updates on science stories
- Radio 4 has an excellent range of archive material on its site –
 - Recommended programmes include – Week in Westminster, Thinking Allowed etc
 - In Our Time (<http://www.bbc.co.uk/programmes/b006qykl>) has a particularly fantastic archive of interviews with groups of academics on a vast range of topics
- TED - watch talks from experts from a variety of fields

Computing & ICT

Mrs Murfin's top tip is Karl Beecher - Brown Dogs and Barbers, an excellent, short, readable book that answers the question 'What's Computer Science all about?' The best introductory book for A Level students. Rarely is there a chapter over 5 pages long. Six sections, each with around 5-6 chapters.

Also make good use of Crash Course Computer Science:

<https://www.youtube.com/playlist?list=PL8dPuualJXtNIUrzyH5r6jN9ullgZBpdo>

Stephen Poole	Trigger Happy: The inner life of videogames <i>A witty, comprehensive and passionate discourse on the videogame explosion. Essential reading for anyone with an interest in this industry.</i>
Robert Cringely	Accidental Empires <i>An insider's account of the origins and growth of the micro-computing industry from the earliest times to the present day; acerbic and funny in equal measure.</i>
Harel & Feldman	Algorithmics: The Spirit of Computing
Aho, Lam et al	Compilers: Principles, Techniques and Tools
Tanenbaum	Structured Computer Organisation
Cormen et al	Introduction to Algorithms
Zed A. Shaw	Learn Python the hard way
Hillis, W.D.	The Pattern on the Stone.

Brian Christian and Tom Griffiths	Algorithms to Live by: The Computer Science of Human Decisions
Charles Petzold	Code: The Hidden Language of Computer Hardware and Software
David Eck	The Most Complex Machine <i>A great book for A Level, supported by a wonderful website with lots of interactive labs, and java applets that can be downloaded for use in lessons.</i>
AK Dewdney	The new Turing omnibus: 66 excursions in computer science <i>If there are any of you who think that the high end of computer science is another form of mathematics, then this book is for you. If you think that computer science is just programming then maybe you should take a look at this book as well.</i>
William Cook	In Pursuit of the Traveling Salesman <i>A great new book with accessible mathematics telling the story of the TSP and introducing a whole lot of computability theory along the way.</i>
Glyn Moody	Rebel Code <i>If you are interested in GNU and Linux, this book is fantastic. Tells the story of Open Source in a very readable way.</i>
Andrew Hodges	Alan Turing: The Enigma <i>A great biography. A fascinating insight into the early history of computing.</i>
John Markoff	What the Dormouse Said

An in depth look at the early history of human-computer interfaces, amongst other things.

Vocking	Algorithms – Unplugged <i>Some of the most beautiful algorithmic ideas in 41 articles written in colloquial, nontechnical language. Most of the articles arose out of an initiative among German-language universities to communicate the fascination of algorithms and computer science to high-school students.</i>
Levitin & Levitin	Algorithmic Puzzles <i>Quite original, includes some of the most classic puzzles in Computer Science and contains special sections on problem-solving techniques.</i>
Charles Petzold	Code: The Hidden Language of Computer Hardware and Software <i>An epic journey from two ten-year old's communicating by torches, through logic and switches, to microprocessors and operating systems. Or as Jeff Atwood describes it another love letter to the computer.</i>
Hey, T	The computing universe: a journey through a revolution <i>An historical survey of computing, drawing out the foundations of computational thinking and the technologies along the way. Some great anecdotes, little known facts and lots of great pictures, written with authority and humour. Ideal for students to 'read around' the subject.</i>

Psychology

Ms Pardesi's top tip is to sign up to the weekly email blog from the British psychological Society (BPS) <https://digest.bps.org.uk/>

The psychology moodle page has a 'super-curricular tab' which should be a first stop for anyone applying for psychology at university, anyone doing a psychology related EPQ and those aiming for A/A*

Also watch 'The Mind Explained' on Netflix. Great for year 12 starting out and year 13s looking to reach top grades and/or study Psychology at university.

And read Ropper and Burrell - Reaching Down the Rabbit Hole: Extraordinary Journeys into the Human Brain
